

# LED Golf Ball E27

**014-100**

## Description

Its special form means the Golf Ball has more surface area than standard LED light sources and therefore also emits more light. The Golf Ball offers outstanding performance for the price. Its casing is made of matt or clear polycarbonate, making it extremely tough and durable. The base's new conical shape is particularly well-suited to the insulation rings of varying market-standard sockets. For this reason, the Golf Ball is ideally suited for indoor and outdoor use.
